Boom Truck Bodies

Are You Struggling, with Cumbersome Rear Lock & Tensioning Mechanisms that takes away from valuable inside load clearance & can easily be lost or damaged?

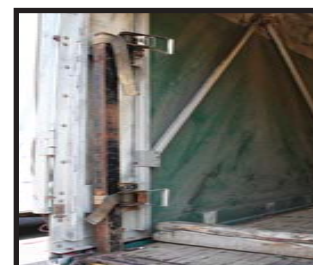

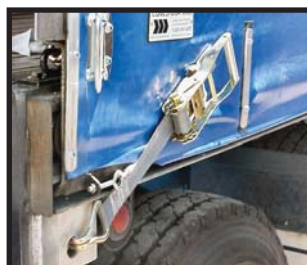

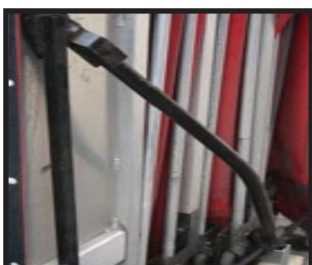

A-Frame Assemblies

Ratchet Assemblies

Post Assemblies

LOOK[®] No Further!..... Aero-Kit & Tarp Technology Innovations released exclusively in February 2008, their newest innovation **Loc'N-Load[™]** a Lock and Tensioning Mechanism unlike any others measuring, **14" Long x 1.75" Dia. x 6.5Lbs**

Ask yourself this Question:How does a Compact Lock & Tensioning Mechanism mounted at floor level distribute the proper uniformed tension of the Tarpaulin?

Our Answer:Advanced Engineering with a Rear Car Frame designed to roll on only 4 wheels!

Loc'N-Load[™] is a High Powered Compact System which fits in the palm of your hand that can easily be retro-fitted to sit flush on existing AK systems without taking up additional load space.

Loc'N-Load[™] travels with the car frame, and is safe guarded against damage or lose and is easily operated with a single handed ratchet.

Switch your Fleet over to **The LOOK[®]** when you demand "Top Value" in an Engineered Flatbed Load Covering Solution.
