

# **The LOOK**<sup>®</sup> Advanced Load Covering Sliding System

**For Boom Trucks**

**Specialized Load Covering for Building Materials**

## Features / Advantages / Benefits:

**The LOOK**® for Boom Trucks was designed specifically to provide the building industry with a load covering solution and guarantee local delivery of products to and from the job site without delays, regardless of the weather conditions.

Warehousing staff and drivers can quickly and easily cover every load while standing firmly on the ground eliminating the potential risk for accidents caused by manual tarping.

Expand your interior warehousing space and improve loading logistics. Trucks and trailers can now be loaded each day with building materials and parked safely outside covered and waiting to be delivered.

Ministry of Labour recognizes load covering systems that can ensure the safety of operators while in the field and keeping drivers off of high loads.

The Drywall & Building Products Industry typically covers products for the long haul with Sliding Load Covering Systems in lieu of ground tarps, and now that convenience is being made available for Boom Trucks with **The LOOK**® ensuring load security and driver safety.

## Corporate Advertising:

- **The LOOK**® Sliding Tarpaulin System is not just a Load Covering Device but has just become your company's strongest advertising tool.
- Imagine utilizing the down time of grid lock traffic each day to advertise your corporate message and/or products & services.
- Billboard Advertising over the road is the fastest growing method for getting your message out to the general public cost effectively.
- Whether its drywall, lumber, doors or windows keep weather sensitive products covered while promoting your core business and maximize your Return on Capital Investment.

**LOOK**® to convert your local delivery flatbed truck bodies and boom trucks to the best value in an Engineered Load Covering System.
