

# **The LOOK**<sup>®</sup> Advanced Load Covering Sliding System

## ***For Truck Bodies***

### ***“Load Covering For Your Local Deliveries”***

[www.slidingtarpsystems.com](http://www.slidingtarpsystems.com)

# Today A Delivery Deck... Tomorrow A Van Body!

## Features / Advantages / Benefits

*The LOOK*® Sliding Tarpaulin System has made it's way into a growing number of manufacturing and warehouse companies where delivering product to their customers requires greater protection against damage and the elements.

Whether you're loading by forklift at dock level, side, or overhead crane *The LOOK*® slides in either direction from ground level, provides ease of operation and a safe environment for your operators.

## Corporate Advertising

Not only is *The LOOK*® used for load covering, but now it can become a company's strongest advertising tool.

In today's local delivery environment a truck can become grid locked for 2-4 hours of stop and go traffic per day. Imagine utilizing that time to advertise your corporate message and/or products and services.

Over the road advertising is a proven way of getting your message out to the general public quickly (and cost effectively).

Whether it's delivering metal products, building products, glass or general freight, consider converting your truck body to a versatile load covering vehicle while maximizing your advertising capabilities ...

## Warranty & Maintenance:

You will have to purchase *The LOOK*® to experience the full impact of why fleets are switching to the best built system in the world. Only *The LOOK*® guarantees the lowest maintenance in the industry over any other system while providing the highest residual value over 10 years.
