

# **The LOOK**<sup>®</sup> Advanced Load Covering Sliding System

**For Straight Flatbeds or Wedge Trailers**

**“Maximize Your Load Covering Versatility”**

# Today A Standard Flatbed... Tomorrow A Versatile Van!

## Features / Advantages / Benefits

The LOOK® for flatbed trailers, maximizes your load covering versatility by converting your flatbed or wedge trailer into a convertible van trailer providing customers with load covering protection and keeping drivers safe and free from injury. Today's transportation industry demands fleets to provide the most suitable equipment at a moments notice allowing customers to ship over sized products with confidence and security. Only The LOOK® guarantees our customers years of trouble free operation while ensuring the lowest maintenance over the life of the system.

### Straight Flatbed System

The LOOK® serves for a wide variety of product being hauled over the road where load covering and security are required. Originally designed for steel hauling and automotive requirements, The LOOK® now covers any product measuring up to 102" in nominal width.

The LOOK® allows 103" inside width clearance as a sliding tarp system, and is D.O.T. Legal in all U.S. states and Canadian provinces for 108" maximum overall width.

### Wedge Flatbed System

Specialty freight requirements in today's transportation industry demand that van haulers provide maximum versatility in their equipment. The LOOK® Wedge exceeds interior width and height dimensions of a high side cube van trailer. Based on specialty flatbed trailer manufactures height capabilities The LOOK® Wedge can provide up to 104" interior height at the front and 110" interior height at the rear underneath the frame.

The LOOK® Wedge provides 103" interior width on any standard system.

### Rear Closure Option: Rear Flap

Available standard with a Crank-Roll Up Flap ensuring the driver always keeps the flap in the down position when travelling or an optional Pull-Up Manual flap.

### Rear Closure Option: Sliding Van Doors

The LOOK® system is the only system where heavy duty van doors can be installed to standard rear car frame without any inside structure alterations or the requirement for additional wheels. (Comes standard with 2 wheels per car plate.)

### Corporate Advertising:

You have seen many small, medium and large companies leaning towards maximizing their advertising expenditures over the road. Think of The LOOK® as a tool for advertising your Corporate Messaging. We would like you to think of us as a branch to your advertising department and let us engage as your partner in growing your business.
