Where Innovation is Ongoing!
the LOOK™ engineered sliding system is a fully modular retractable tarp & alum. frame system designed to provide load covering versatility on any open deck trailer or truck body for all general freight requirements.

Dedicated Steel Haulers Sliding System

SlideKit™ is a dedicated Steel Haulers arched roof retractable tarp system, reducing wind drag, providing greater road handling & better fuel economy.
ALCS is the perfect load covering solution when requiring van protection combined with flatbed versatility. This hard top, soft sided curtain system was designed for easy side and rear load access. Perfect for building, construction and lumber products ALCS guarantees cargo can be off loaded regardless of side shifting. Gain access to one side at a time providing weather protection to the rest of the load.

Side Kits remain the most economical load covering solution in the industry. This modular post, panel, bow and tarp system allows any flat deck trailer or truck body to be quickly converted into a load covering system and then back into a flatbed. Available in 2ft – 8ft heights with heavy duty or Lite weight panels, Side Kits are built for load versatility.
Open Top Load Covering

LCS represents a diversified line of Hydraulic load covering systems for a multitude of applications, from aggregate, waste, scrap metal to construction materials.

Our Unique TWIN COVER is a new product addressing those long time tarp covering problems for long transfer trailers. Learn more at http://loadcovering.com/wastedumptarpsystems.htm

DUMP TARP SYSTEMS COVERSING AMERICA

LCS represents a full & expanding product line of Over-center Arms, Retractable Cable, & Side Roll load covering systems in manual & electric models. Designed in mesh & vinyl for Aggregates, Agricultural, & Construction industries, rely on the company that has made its business covering loads since 1979.

Not only does LCS stand behind our products, we STAND on them!
Each LOAD ARMOUR® product is designed with attention to quality and detail, providing the transportation industry with products that meet the storage, load securement, safety and security requirements expected in a rugged versatile market. LOAD ARMOUR®, the name says it all!

FUEL SAVINGS
By improving aerodynamic efficiency Airtab® equipped vehicles require less power and as a result less fuel to travel at the same speed.

GREATER STABILITY
Less turbulent air behind a vehicle means the vehicle becomes more stable on the road and less reactive to gusting winds and weather.

STAY CLEANER LONGER
Changing the way air and water behave with Airtab® helps keep the rear of the vehicle cleaner longer.
Over the Road Billboard Advertising

Load Covering Solutions identified years ago an unique feature enhancement for why open deck trailers should be equipped with a load covering system. The technology today with digital printers and their ability to reproduce vividly 4 color imaging on soft side vinyl materials has overwhelmingly impacted the requirement for covering trailers. At Load Covering Solutions, we will take it from design to final completion stage to provide you “our customer” with the best over the road advertising campaign possible. “Ask any of our satisfied customers!”. LCS is also one of the only companies in our industry that provides in house capabilities to liquid laminate 10ft wide ensuring a 32 micron protective coating seals the inks into the vinyl substrates. Without it, your inks will start to fade inside of 3 years as stated by 3M.

Load Covering Solutions services most major Fleets, trailers OEM’s and Equipment Dealers as well as these Notable Agencies:

**US NAVY:** Florida, Rhode Island, Sicly
**US Military:** Fort Campbell, KY
